

Starter Bench Design Goals

Simple to build at the field with hand or power tools

No complex cuts required

Low cost - in the \$40 to \$50 range

Will not tip over with high thrust gas engines up to 50cc

At least 10 sq ft of space on top

Easy to move even on grass field

No wheels required

Lumber waste kept to minimum

Lumber stock sizes kept to minimum

Can be made from treated or untreated lumber

Can be assembled with nails or screws

Sturdy

Stable

Not cause damage to plane wing or tail

Hold plane at wing, not tail
